2017. 07 Rev. 4

Pride at Work

Hyundai Heavy Industries strives to build state-of-the art earthmoving equipment to give every operator maximum performance, more precision, versatile machine preferences, and proven quality. Take pride in your work with Hyundai!

The upper frame is designed with optimum structural integrity to absorb impact and operational stress. Reinforced lower frame and strenghened fenders provide exceptional strength and longer service life to withstand tough working conditions.

Engine Technology

Efficient Control System

are live.

Advanced Hydraulic System

free grease chamber.

The cabin is roomy and ergonomically designed, for reduced noise and good visibility. The cabin frame meets international standard TOPS, ROPS, FOPS ensuring operator safety.

Operator Convenience

also intergrated environment.

Wide open access of doors, covers, hoods is designed for easier maintenance. The air cleaner and centralized grease fittings are also integrated for easy service.

Extended Life of Components

reduce operating costs.

Robert 60w-95

Machine Walk-Around

Rugged Upper and Lower Frame

The fuel efficient, Tier 2 certified Yanmar 4TNV94L – PHYBY engine provides proven, reliable power.

All control devices are arranged for higher productivity and improved operator comfort. Efficient and ergonomic controls allow an operator to control the machine in any working environment. A safety lever on the left-side console is provided to prevent exiting the cabin while hydraulic controls

The advanced hydraulic system includes an arm flow summation system, boom holding system and a swing parking brake for smooth and fine control. Other valuable features include a hydraulic damper in the travel pedal, and a hydraulically lubricated swing reducer with a leak-

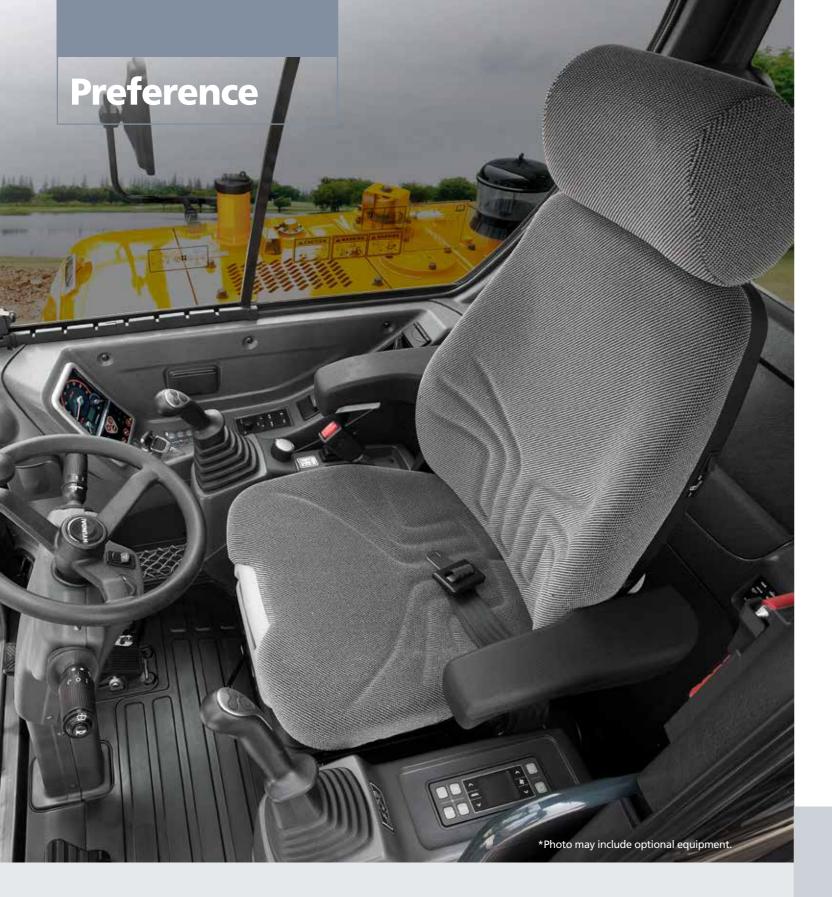

Comfortable and Durable Cabin

Convenient operator features include a suspension seat, excellent visibility, and variable storage space for advanced operator comfort. The newly designed LED cluster provides current information, including engine RPM, engine coolant, fuel level, and electric components. A hydraulic function safety lock and auto diagnostic features are also available. lock and failure diagnosis functions are

A powerful air conditioning system and Radio/USB interface contribute to a comfortable work

Easy and Simple Maintenance

Long life components and wear parts, including hydraulic filters, oil, shims, and bushings, help to

Wide Cabin with Excellent Visibility

The newly designed cabin was conceived for more space, a wider field of view and operator comfort. Special attention was given to a clear, open and convenient interior with plenty of visibility on the machine surroundings and the job at hand. This well balanced combination of precision aspects put the operator in the perfect position to work safely and securely.

The R60W-9S operator's cab is designed for a comfortable operating experience. Operator Comfort An ergonomically designed suspension seat, adjustable arm rests and a spacious environment helps to minimize operator fatigue. Control levers are easily accessible and a instrument display is provided to keep the operator informed of pertinent machine information.

- listening to music favorites.
- 3. A hands-free cell phone function is available for safe and convenient phone use.
- 4. Ergonomically designed joysticks reduce operator fatigue during the work day.
- 5. Multiple storage compartments are available for additional convenience.

Enhanced Cabin

Hyundai's R60W-9S is equipped for convenience and productivity.

1. Adjustable position window prevents window movement while operating. 3. A tilt-up left side control console provides easier entrance and exit from the cab.

1. A large upper roof glass provides additional visibility and a a roller shade is provided to reduce glare and sunlight. 2. An advanced audio system with AM/FM stereo with USB player, plus remotely located control is perfect for

Radio & USB player with remote control

Hands-free cell phone

lovstick

Storage compartment

2. A sliding fold-in front window is easily opened and safely stored in an open position to improve ventilation and visibility.

4. A power climate control system provides the operator with optimum air temperature.

Climate control system

Operator - Friendly Cluster

The advanced new LED cluster allows the operator to select his personal machine preferences. The monitor displays engine rpm, engine oil temperature, water temperature and information for all electronic devices.

Button selections are provided for auto idle mode, max power mode, and travel speed. A security feature is also provided to prevent the machine from starting without a proper password.

Precision & Performance

HYUNDAI

Innovative hydraulic system technologies make the R60W-9S excavator fast, smooth and easy to control. Also R60W-9S is designed for maximum performance to keep the operator working productively.

*Photo may include optional equipment.

Excellent Performance

Hyundai's 9S series offers the operator maximized productivity and efficiency. A convenient throttle volume dial with LED light allows the operator to customize engine power according to job requirements. A max power button maximizes machine speed and power for mass production. The R60W-9S also features an auto idle system which improves fuel efficiency and reduces cab noise.

Improved Hydraulic System

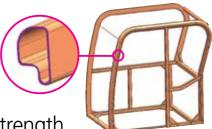

Variable Swing Boom (Option)

The R60W-95's boom swing function is designed for efficient work in congested residential and urban areas. The boom can be offset left or right within an operating range. Plus, increased swing torque provides enhanced operating capability on the slope.

To achieve optimum precision, Hyundai redesigned the hydraulic system to provide the operator with super fine touch and improved controllability. Improved pump flow control reduces flow when controls are not being used to minimize fuel consumption. Improved spool valves in the control valve are engineered to provide more precise flow to each function with less effort. Improved hydraulic valves, precision-designed variable volume piston pumps, fine-touch pilot controls, and enhanced travel functions make any operator running a 9S series look like a smooth operator. Boom-down flow regeneration and control valve technology are newly improved.

Structure Strength

The 9S series cabin structure has been fitted with stronger but slimmer tubing for more safety and improved visibility. Low-stress, high strength steel is integrally welded to form a stronger, more durable upper and lower frame. Structural integrity was tested by way of FEM (Finite Elements Method) analysis and long-term durability tests.

Yanmar 4TNV94L – PHYBY

The Highest Engine Power in its Class

Yanmar 4TNV94L – PHYBY engine provides 20.6 kgf·m (149 lbf·ft) of maximum torque with 57 HP at 2,400rpm of rated power. This means the R60W-9S runs with the most power in its class, giving you more power to get the job done.

Profitability

R60W-9S is designed to maximize profitability through improved efficiencies, enhanced service features and longer life components.

Fuel Efficient

9S series compact excavators are engineered to be extremely fuel efficient. A newly applied to reduced noise and improved

cooling fan clutch contributes to reduced noise and improved fuel efficiency.

Wide Open Engine hood

A newly designed full-open type engine hood makes service more convenient on the R60W-9S.

Extended Life Components

The 9S series is designed for longer lubrication intervals and extended component life. Hydraulic oil can last up to 5,000 hours before changing. Also, a new center pivot roller bearing design, now double tapered, requires less maintenance as well. Long life and extended wear components save the operator time and money.

*Photo may include optional equipment.

Improved Durability

The R60W-9S is equipped with counterweight rear guards to protect the engine hood. Attachment pin with lock-nut type prevents deformation of boom lug and reduces the side play at the boom to arm connection for a long life.

Easy Access

Centralized grease fittings and easy change plastic air cleaner provide faster, easier service and maintenance.

Specifications

| MODEL | | | YANMAR 4TNV94L – PHYBY | | | |

1. Lifting capacity is based on SAE J1097, ISO 10567.

Lifting capacity of the Robex Series does not exceed 75% of the tipping load with the machine on firm, level ground or 87% of full hydraulic capacity.

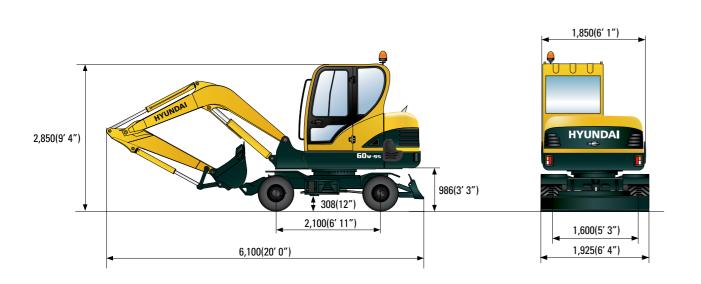

Rating over-front E Rating over-side or 360 degree

3. The load point is a hook located on the back of the bucket.

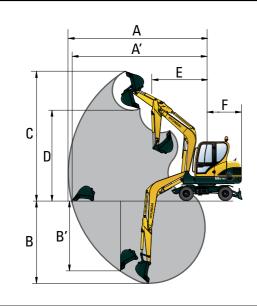

4. (*) indicates the load limited by hydraulic capacity.
